

I travel through out the area of the United States and I depend on XM Radio and there Traffic and Weather Stations Channels. It is hard to find stations on both the AM and FM radio that give a consent update of traffic. I would like to see you defeat this bill and continue to allow XM Radio to provide there continuing service of the Traffic and Weather Reports that they give their subscribers! I believe that XM Radio has a good thing going for them, they came up with an idea and they provide one of the best services that I pay for. I feel that the people and companies attacking XM Radio are pissed off because they took service to the next level for their customers. This is the very reason that I started to subscribe to XM Radio and why I continue to pay XM Radio for their continuing excellence in their product and their service. I am asking you to respectfully reject the NAB's petition 04-160.

Thank you

Stephen Drehable
